

Update : September 2009

# MINIMAXline®

Suggested pan combinations	Broilers		Turkeys			Ducks	
	L	H	B ( <i>&lt; 6 w</i> )	Me M	( <i>&lt;12kg</i> ) F	M	F

L = light H = heavy B = brooding Me = medium M = males F = females

Top support							
Support cone							
Adjuster ring	Short						
Grill	14-strut						
	10-strut						
	4-strut						
Pan	Classic (76 mm)						
	L (65 mm)						
Collar							
Number of birds/pan	50-80	50-75	60-70	50-70		60-70	
<b>Animal Info</b>							
Average age at removal (weeks)	6	8	6	17	14	10	13
Average weight at removal (kg)	2,2	3,5	2	13	7	2,5	4,5
Density (birds/m <sup>2</sup> )	16-20	10-16	8-10	2-3	4-5,5	10-13	
Max daily feed intake (grams/bird)	170	220	160	460	320	180	250
<b>General &amp; technical Info</b>							
Pan	Material	polypropylene (nylon top support)					
	Diameter	330 mm					
	Average pan content	660 grams (feed level at 4)					
Transport	Material tubes	galvanized steel					
	Outside diameter tube	44,5 mm					
	Feed amount (*)	600 grams/meter tube					
	Power unit	0,37 kW - 1/2 HP 3 phase 50 Hz 350 RPM					
	Average transport cap.	450 kg/hour					
	Max length per fill point	150 m					
	Max. pellet diameter	4 m					
Suspension points	every 3 m						
Average height	3,25 m						
Installation time (including assembly, suspension and electricity supply)	3 skilled people : 1 line (100 meters per day)						

(\*) Based on a specific weight of 0,65 kg/dm<sup>3</sup> !
