Ideal for large groups.

**ROXELL®**

## Blu'Hox™

### 1 Fast and uniform growth

- Fresh feed and water located on the same spot.
- Plenty of feeding and drinking space around the pan. (Blu'Hox 120: 6 animals. Blu'Hox plus 120: 10 animals.)
- The pigs determine their individual ration and mixture of feed and water.

### 2 Important feed and water savings

- The special pan shape and the feed saver edge keep the feed in the center of the pan.
- The grill offers the pigs spacious, quiet and individual eating spots.
- The large feed pan prevents heavy animals from wasting feed and water.
- Any spilled water mixes with the feed in the pan and is consumed.

## Blu'Hox™

### 3 Easy management

- Blu'Hox offers an accurate adjustment of the feed level.
- The asymmetric hopper ensures a smooth feed flow and eliminates feed bridging.
- Blu'Hox feeders are easy to clean.

### 4 Benefits of large groups

- Important savings in house construction (uncomplicated feeding system, minimum penning, less walkways, etc...)
- Stress free groups due to the clear pen zoning (activity, resting, eating area).
- Excellent uniformity of the group.
- Comfortable handling of the pigs.
